

SL ENGINEERS – SUSTAINABILITY POLICY

1. Vision

SL Engineers strives to support a cleaner energy mix for a sustainable development across South-East Asia.

2. General Principles

Sustainability is at the essence of SL Engineers practices. We focus on delivering sound advices to renewable energy projects which provide environmental, social and economic benefit to the community.

3. Our commitment:

- Working only on projects which use renewable energy technologies
- Minimising the impact generated by our activities on the environment and the community
- Having a net positive impact to the world

4. Our day to day Implementation

We will achieve these commitments by:

- Selecting projects which have net positive impact
- Promote sustainability awareness through our team
- Minimising our carbon foot print by:
 - Using low energy consumption appliances and devices
 - Avoiding carbon intensive travels when conference call can be implemented
- Providing waste management information
- Implementing waste management procedures
- Support employees getting involved in clean-up events
- Reporting carbon foot print on an annual basis
- Reviewing our sustainability policy on an annual basis

5. Changes to this Policy

This policy is to remain in force until any of the following occur:

1. The related information is amended/replaced; or
2. Other circumstances as determined from time to time by the management team.

For and On Behalf of SL Engineers

Louis Lefevre

Technical Director
